INTRODUCTION

PUSS is a social driven project that aims to unite cat fans around the world with the help of token based on BNB Smart Chain (BSC). It was started by a decentralized team who wishes to use web3 tools to connect diverse, like-minded individuals into a motivated and organized community.

\$PUSS is a cryptocurrency token aimed to tap into the meme crypto market and take it by storm. We believe that in the long-run PUSS can outpace SHIB and DOGE, becoming a global meme reserve currency.

\$PUSS holders can unlock exclusive access to the PUSS AI Alpha Club Discord Channel, where they can gain valuable insights on earning potential from AI-related applications and discover ways to save time and increase productivity through the implementation of AI technologies.

Additionally, PUSS will release a new NFT gallery with additional perks for PUSS holders, unlocking new possibilities for \$PUSS and PUSS related NFTs.

DAO

Decentralized Autonomous Organization is a pinnacle of web3 evolution and serves an important purpose in the future development of PUSS. Thanks to DAO, the community can shape the project in many ways unavailable for cryptocurrencies governed in a centralized manner. Community's first important decision to make was the introduction of tax and reflections on every PUSS transaction. Since the introduction of PUSS V2, there have been many more changes and updates to be made by the community through the DAO voting system.

PUSS PROTOCOL

New version of the token: PUSS V2 introduces a simple and straightforward tax schedule that is charged with each buy, sell and transfer. 0,01% from each transaction goes to the charity wallet, which will be governed by the community through on-chain DAO voting. In comparison to PUSS V1, the decision has been made that reflections, LP acquisition tax no longer apply to PUSS V2.

Regulatory landscape has changed and reflections have held back many other memecoins in getting listed on top-tier exchanges. Moreover, lower overall tax may positively influence volume and the number of holders.

TAX BREAKDOWN (TAX = 0.01%)

DAO/Charity Treasury

Tax will be used for charity
and growth expenses.

DAO treasury allocation and DAO/charity tax are **used for**:

- charity donations allocation
- development of the cat philanthropy fund (charity practice, education, research)
- advanced treasury management strategies to maximize capital growth
- growth fund used for marketing and development purposes
